Technical Skills

General purpose: HTML/CSS/Javascript, Git, Bash, MySQL

Back-end technologies: Java, Python

Experience & Projects

Infor, New York, NY

Software Engineer:

March 2019 - present

- Built, modified, and extended customer-specific themes and plugins for Infor Rhythm, a cloud-based ecommerce platform and content management system that is integrated into select Infor ERP solutions
- Translated design compositions and annotated wireframes into rich interactive web experiences
- Collaborated with UX Architects and visual designers to implement custom UI components using HTML/CSS and JavaScript
- Worked closely with team members and client partners from initial project concept work through product delivery
- Coordinated development tasks and activities (using JIRA) with team members across multiple time zones under tight deadlines
- Built API calls which allowed customers to extend and build on top of existing Rhythm product functionality
- Worked with QA teams to test project deliverables to ensure they are cross browser/device compliant
- Participated in code audits and sprint review sessions, oversaw and managed merge requests within project repos

Infor, New York, NY

Developer, GenOne program:

October 2018- December 2018

- Wrote Python automation scripts for event monitoring at all steps of the software build
- Created weather application in Python that utilized Open Weather Map's API to get the current weather forecast
- Developed Linux shell script to dynamically create HTML web project boilerplate
- Utilized Git for version control and committed code and changes to a GitHub repo
- Agile management of team activities using Trello system for communication and task tracking
- Gained valuable knowledge of SQL relational databases utilizing querying language to manipulate, store, and retrieve data

Guttman Community College, Manhattan, NY

September 2017- October 2018

Computer Science Tutor:

- Assisted underrepresented students learn programming concepts in java
- Aided in the learning and understanding of Objected Oriented Programming to computer science students
- Helped students assimilate to college life and give guidance students' success in completing their degree
- Presented workshops on how to be a well-rounded college student

Paladin, New York, NY Intern:

June-August 2016

- Created web pages using HTML/CSS and Bootstrap to improve existing UI/UX of Paladin marketing site
 - Completed Code to Work Summer Internship program at the Grand Central Tech and participated in a week-long web development boot camp covering HTML/CSS/Python and attended weekly professional development workshops with Beyond Coding
-

Education

Lehman College/CUNY, Bronx NY

Bachelor of Science in Computer Science

Spring 2019

- NSBE (National Association for Black Engineer), Lehman College Track Team, Urban Male Leadership

Stella and Charles Guttman Community College/CUNY, New York, NY

Studied Information Technology

June 2016
